

Principles of Microeconomics
ECON 2010 - 700
Fall 2022
Student Comments

1. Rimjhim was a good professor and had homework that encouraged learning rather than giving busy work. She puts a lot of effort into teaching this class and cares about her students doing well. She is always available to help us and answer questions. Overall a great professor! :)
2. She was very good at teaching the material in a way that helped me not only understand it but remember it and be able to apply it to the homework or quizzes. I think that she was a well-spoken professor, most of the time she didn't move too fast, where I was lost in the material, and she gave a lot of different examples that helped me better comprehend the different topics.
3. understanding and made it fun to be in class, really enjoyed this
4. it was effective when she used the smart board thing to draw pictures and to explain problems
5. Professor Saxena was a good instructor and always clarified a concept if needed. Although the topics were dull, and there was nothing she could do about that, she found a way for students to always be engaged and involved.
6. I would absolutely take a course with Rimjhim again. She cared about all of her students learning the material and is flexible. She is kind, knowledgeable and is everything I hope for in a professor. Think pair share was one of my favorite parts of the course because it allowed me to form friendships and deeply understand the material. I also liked having open note quizzes and 2 exams. The extra credit also helped me to focus on learning the material and not be hyper focused on getting perfect scores on everything. Great course overall and I would love to take a course with her in the future.
7. Very kind and helpful teacher.
8. Easily the most effective aspect of the class was he ability to thoroughly go through every topic. From chapter to chapter she gave critical examples, intitiated creative challenges, and allowed students to absorb the content. I think an improvement could be better teamwork between her and her teacher assistants.
9. She did really well in the large classroom. It is hard to engage a 200 freshman, but her lectures are interesting and entertaining.
10. I love how you engage all of the students, and focus on the subject we are being taught. The slides does go a little fast, but overall I feel very confident in what we learn everyday.
11. I think Rimjhim brings a very good energy to the class. She knows what she's teaching and is able to summarise that information fairly well. That being said, sometimes classes can move a little fast.
12. I really enjoyed this class and the structure you created. I learned a lot and this was one of my favorite classes I have ever taken.
13. She was a fantastic professor and encouraged learning and was very understanding when I was having a really difficult time this semester.
14. Great Teacher
15. I would take a course with Rimjhim again. She was supportive and understanding when it came to our course. When she saw that we struggled she worked to find a solution. She was flexible when it came to homework and grades. She wrote notes out which was visually helpful and helped me understand the concept.

16. Really kind person. She was a great teacher and very interactive with her class. Lots of time she would ask questions and have us contribute in an engaging way. Has really detailed homework that is challenging but at the same time teaches and has good content for the tests.
17. The most effective aspects of this course is the consideration she has for her students overall.
18. I liked having Rimjhim as a teacher she was very knowledgeable about the criteria and she was able to offer assistance or accommodations when needed. It was pretty easy to understand a lot of the topics but it wasn't very engaging.
19. I enjoyed Rimjhim as a teacher. She was understanding and professional and spoke very well. She was nice and I learned a lot.
20. The homework is very helpful because it allowed me a chance to practice and understand the content that was covered in class. I can tell you enjoy the content you teach and that you put a lot of effort into trying to teach in a way that actually help people understand. I also enjoyed when you brought in real life examples.
21. I was surprised to hear it was her first year teaching from how well she lead the class. She worked hard to help students understand all the concepts we covered and understood that there were certain topics that were harder than other. She made sure to explain things in different ways to help the most people learn the material. She was fun and energetic and kept the material interesting and relevant.
22. I have no constructive comments; she is a fantastic teacher.
23. I believe the most effective aspects were how Rimjhim was able to connect most of the concepts to the real world and als how she spend a lot of time showing how each new concept effected supply and demand graphs.
24. SHE WAS A DEVOTED TEACHER WHO CARED ABOUT THERE STUDENTS UNDERSTANDING FOR A SUBJECT
25. As a PhD candidate, she is doing a good job as a new professor.
26. I thought that the real world scenarios at the end of the lectures were an effective method of cementing the concepts into students minds.
27. I enjoyed your class a lot. I feel like how you structured the class allowed me to learn best in the way you interacted with the class and allowed the kids that wanted to be there to be there.
28. She did a great job explaining things and providing comparisons to real world problems.
29. Very understanding of students needs and cooperated kindly with professionalism.
30. Some of the most effective strategies used during this course was the use of technology. When you gave extra examples on the board, I think overall it helped the class as a whole
31. She was very passionate and helpful, you can tell she cared about her students success.
32. I think the course was very efficient. I really enjoyed the quiz formats and the flow of the class. The pace was very easy to follow.
33. Rimjhim did a great job teaching this class, especially for her first time. She was always looking for ways to improve herself and the class itself. Rimjhim made this class very enjoyable!
34. chill but very helpful
